

# Review from NEWAL Study Tour 2023

## What was good?

The trip as a whole, as well as the various training courses and company visits.

## What were your highlights?

The fact that I adapted easily and got involved in all the program's activities was my strong point.

## What did you take with you from this Study Tour?

I focused on water treatment and management, as well as solid and plastic waste management. I also remembered the culture and savoir vivre of the Swiss.

## Could you already use your knowledge from the Study Tour?

for the time being, I won't be able to use the knowledge acquired during the study trip. In the future, the water treatment techniques used in Switzerland will serve as a recommendation for my thesis.
